b_tree_indexing_internals (Initial Draft)

Domain: Database Systems | Document ID: b_tree_indexing_internals_v1
Specification Standard: IEEE Capstone Evaluation Corpus

Executive Overview:

B+ Tree node splitting, branch factor, disk page alignment, sibling pointers, and range scan performance.

Methodological Verification & System Lineage:

This specification is catalogued in IntentCloud for intent-aware hybrid retrieval.
Text chunks are indexed into 384-dimensional dense semantic vectors and 1,000,003-dimensional sparse feature-hashed token projections.
Candidate pools are unified using scale-invariant Reciprocal Rank Fusion (k=60).
Explainable citation attribution is extracted using cross-encoder cross-attention.
