# cross_encoder_reranking_attention (Initial Draft)

Domain: Information Retrieval | Document ID: cross_encoder_reranking_attention_v1
Specification Standard: IEEE Capstone Evaluation Corpus

## Executive Overview:

Full cross-attention token interactions in cross-encoders for precision query-document reranking and classification.

## Methodological Verification & System Lineage:

This specification is catalogued in IntentCloud for intent-aware hybrid retrieval.
Text chunks are indexed into 384-dimensional dense semantic vectors and 1,000,003-dimensional sparse feature-hashed token projections.
Candidate pools are unified using scale-invariant Reciprocal Rank Fusion (k=60).
Explainable citation attribution is extracted using cross-encoder cross-attention.
